CONTENTS

# What's inside

| | | |
|---|---|---|
| 01 | What EventFlow is | Who it's for, and three words you'll see a lot |
| 02 | Getting started | Sign up, verify, sign in |
| 03 | Registering for events | Free, paid, coupons, teams |
| 04 | Your dashboard | Tickets, payments, certificates, your data |
| 05 | Running your own event | The six-step wizard |
| 06 | On the day, and after | Check-in, feedback, certificates |
| 07 | When something's off | Common problems and fixes |

**15**
MINUTES YOUR SEAT IS HELD

**6**
STEPS TO PUBLISH AN EVENT

**12**
ADD-ON MODULES

The admin side (roles, permissions, every admin page) is in the companion **Admin Reference**.

CHAPTER ONE · INTRODUCTION

# One place for the whole event.

Listing, tickets, payments, check-in and certificates, in one app instead of five tools taped together.

01

ATTENDEES

### Find & go

Browse events, register in a minute, keep the ticket on your phone, show the QR at the door.

ORGANIZERS

### Publish & run

Build an event in six steps, share the link, scan people in with a phone camera, send certificates after.

ADMINS

### Keep it in order

Members, payments, refunds, the public website and add-on modules, from one admin area.

## What you can do here

The app changes with who's signed in. An attendee sees events and their tickets. An organizer also gets the admin area for their organization. A platform admin sees every organization on the platform.

> **Eventbrite for the listing, a payment link, a QR app at the gate and a mail merge for certificates. EventFlow does all four.**

## Worth knowing

- **Many organizations, one platform.** A university can run every club and department on one install, each with its own public site.
- **A website builder.** Each organization gets a public site built from drag-and-drop sections.
- **Add-on modules.** 12 of them: live quiz, live poll, leaderboard, photo gallery, blog, countdown, weather, team profiles, sponsors, volunteer sign-up, merch store and an event calendar.
- **Roles.** Nine of them, so the person handling refunds doesn't also need the power to delete events.

THREE WORDS WITH A SPECIFIC MEANING HERE

**Enterprise**: the top level, like a whole university or company. **Organization**: a group inside it, such as a club or a department. **Event**: one happening, with a date, a venue and registrations.

CHAPTER TWO · GETTING STARTED

# Your first five minutes.

Create an account, confirm your email, sign in.

02

## Create your account

1. Open `/signup`. Enter your name, email, phone and a password. A strength meter tells you when the password is good enough.
2. Tick the box for the Terms and the Privacy Policy. Both links open in a new tab, so your form stays filled in.
3. College or company is optional. You can add it later in your profile.
4. We email you a 6-digit code. Type it in. It works for 10 minutes, and five wrong tries cancel it, after which you ask for a new one.
5. Done. You land on `/dashboard`.

## Signing in

The sign-in page has two tabs.

TAB 1

### Email + password

The usual way. **Forgot your password?** sits right under the password field.

TAB 2

### Login with OTP

Type your email, get a code, type the code. Handy on a borrowed laptop, or when the password has slipped your mind.

GOOGLE AND MICROSOFT

The **Sign in with Google** and **Sign in with Microsoft** buttons appear only if the people running your EventFlow have switched them on.

**NO CODE IN YOUR INBOX?**

Look in spam first. **Resend OTP** unlocks after 30 seconds.

CHAPTER THREE · REGISTERING

# Pick a ticket. Fill it in. You're in.

Free, paid or team event, the form is the same three steps.

03

| step 1 | step 2 | step 3 | done |
|---|---|---|---|
| **Ticket** | **Your details** | **Review** | **Your ticket** |
| Pick a type, add a coupon | Name, email, the organizer's questions | Check it, confirm or pay | QR code, calendar file, PDF |

## A free event

1. On the event page, hit the register button in the side panel.
2. **Ticket:** choose a ticket type. Many free events have just one.
3. **Your details:** name and email are filled in if you're signed in. Answer any questions the organizer added, such as year of study or food preference.
4. **Review:** accept the event's terms and press **Confirm registration**.
5. Your ticket appears with its QR code, an add-to-calendar file and a PDF download.

## A paid event, with a coupon

1. On the Ticket step, type the code into the coupon field and press **Apply**. The total updates and shows the discount.
2. On Review, the button shows the amount, for example **Pay ₹449**. Razorpay opens: card, UPI, net banking or wallet.

3. Once the payment goes through, the ticket shows up in `/dashboard/tickets`.

**YOUR SEAT IS HELD FOR 15 MINUTES**

When you start paying, the seat is kept for you for 15 minutes. If the payment window closes, go to `/dashboard/events`: **Complete payment** takes you back (the button then says **Retry payment**), and **Release seat** lets it go. After 15 minutes unpaid, the seat goes back on sale automatically.

## A team event

Some events take teams. The event page says so, along with the team size.

TEAM LEAD

### Create a team

Name it and you get an invite code. Send the code to your teammates.

TEAMMATE

### Join a team

Enter the code. If the team has room and the code is still valid, you're added.

CHAPTER FOUR · YOUR DASHBOARD

# Everything you've signed up for.

`/dashboard` is home once you're signed in.

04

## What's where

| | |
|---|---|
| `/dashboard` | Counters and your upcoming events, with countdowns. |
| `/dashboard/events` | Everything you've registered for, under Upcoming, Past and All. Cancel here before an event starts, or finish a payment you left halfway. |
| `/dashboard/tickets` | Your tickets. **Full screen** blows the QR up for the gate. You can also add the event to your calendar, download a PDF, or use **Transfer ticket**. |
| `/dashboard/saved` | Events you've hearted. |
| `/dashboard/certificates` | Certificates from events you attended, ready to download. |

| | |
|---|---|
| `/dashboard/payments` | Every payment, its status and its receipt. |
| `/dashboard/profile` | Name, phone, city, bio, college, company and designation. |
| `/dashboard/settings` | Notifications, password, **Download my data** and **Delete my account**. |
| `/dashboard/notifications` | Messages from the platform and from organizers. |

GIVING A TICKET AWAY

### Transfer ticket

Enter your friend's email. They get a fresh ticket number and QR code, and your old QR stops working.

NO SIGNAL AT THE VENUE?

### Tickets on your phone

Tickets you've opened are kept on your device, so `/dashboard/tickets` still shows them offline. They're cleared when you sign out.

YOUR DATA IS YOURS

**Download my data** in Settings gives you everything we hold about you as a file. **Delete my account** removes the account for good.

CHAPTER FIVE · ORGANIZING

# From draft to live in six steps.

Save a draft whenever you like, preview what attendees will see, publish when it's ready.

05

## First, you need an organization

Every event belongs to an **organization**. If you don't have one, open `/admin/create-org` and fill in the name, web address, category and contact email. You become its admin. Your email has to be verified first.

## The six steps

| | |
|---|---|
| 1 **Basic Info** | Title, web address, category, tags, descriptions and visibility: Public, Private, Invite Only or Unlisted. |
| 2 **Date & Venue** | Start and end time, time zone, and a venue address or an online link. |

| | |
|---|---|
| **3 Tickets** | Ticket types with price, quantity, a per-person limit and an optional sale window. |
| **4 Registration Form** | Extra questions for attendees (text, choices, checkboxes, file upload), each optional or required. |
| **5 Media & Details** | Cover image, FAQs, sponsors, rules and refund policy. |
| **6 Review & Publish** | Everything on one page. **Preview** opens the public page with a "Preview mode" bar and a link back to the admin area. |

DRAFTS

### Save as draft

On every step. Drafts never appear in the public list. Only people who can edit the event can preview them.

APPROVAL

### Pending approval

If your enterprise checks events before they go live, publishing sends the event for approval first. You'll see when it's approved.

CHAPTER SIX · ON THE DAY

# Scan. Beep. Next.

A couple of seconds per person at the door.

06

## If you're attending

1. Open `/dashboard/tickets` and tap the ticket.
2. Press **Full screen** so the QR fills the screen.
3. Someone scans it. You're in.

## If you're on the door

1. Open the event's check-in page, `/admin/org/events/[id]/check-in`, on a phone. Allow the camera.
2. Point it at each QR. A green confirmation appears and the count goes up.
3. A QR won't scan? Search by name, email or registration number and check them in by hand.

## After the event

- The organizer issues certificates from `/admin/org/certificates`. They show up in each attendee's `/dashboard/certificates`.
- Attendees can leave feedback at `/events/[slug]/feedback`, and organizers see the results.
- Anyone can check that a certificate is genuine at `/verify`, using the code printed on it.

CHAPTER SEVEN · TROUBLESHOOTING

# When something's off.

The usual suspects, and what to do about each.

07

| | |
|---|---|
| **"Event is full"** | Every seat is taken. If the event keeps a waitlist, you're on it, and the organizer moves people across by hand when seats free up. |
| **"You are already registered"** | You have a registration already. Look in `/dashboard/events`: it may still be waiting for payment. |
| **Paid, but no ticket** | Check `/dashboard/payments`. If the payment shows as complete but there's no ticket, contact the organizer (their email is on the event page). |
| **Payment window closed** | **Complete payment** in `/dashboard/events` within 15 minutes. After that, register again. |
| **QR won't scan** | Ask the door team to look you up by name or registration number. |
| **Forgot password** | `/forgot-password`: enter your email, type the code, choose a new password. |
| **Coupon rejected** | Wrong code, expired, used up, or not valid for that ticket type. The message tells you which. |
| **"Too many attempts"** | Five wrong codes cancel the code. Ask for a new one on the same screen. |
| **Want a refund** | If the event is cancelled, you get a full refund automatically. Otherwise ask the organizer. The rules are at `/refunds`. |

## Who to ask

For anything about a particular event (payments, certificates, a venue change), email the organizer. Their address is on the event page, and they usually reply faster.

For problems with your account or the platform itself, use `/contact`.

---

That's the User Guide. Roles, permissions and every admin page are in the **EventFlow Admin Reference**.
